Dear Data

Planning

Initial Ideas – Representation

Game Buttons

- Use of D-Pad Buttons, Triangle, Square etc. to depict data.

Chemistry Formula

- Use of elements arranged in a structure to depict data.

Tarot Cards

- Use of tarot cards to depict data.
- 78 Different Tarot Cards

Initial Ideas - Data

Productivity

- Depicts my productivity through the day using keys.

Spendings

- Depicts my spending throughout the day using keys
- Could be purely pricing or categories

Fitness

- Depicts my calorie intake and burnt throughout the day

Final Decision

The data I will be collecting will be my productivity throughout the day. I will track the productive activities I want to do more of such as:

- Sleeping
- Revising – Separated into subjects
- Working
- Cleaning
- Researching
- Exercise

This will be depicted using chemical formula, each activity will have its own element and the count will say how long it was for.
